Central Elastic Corporation Rubber Band Manufacturer

Prai, Penang, MALAYSIA

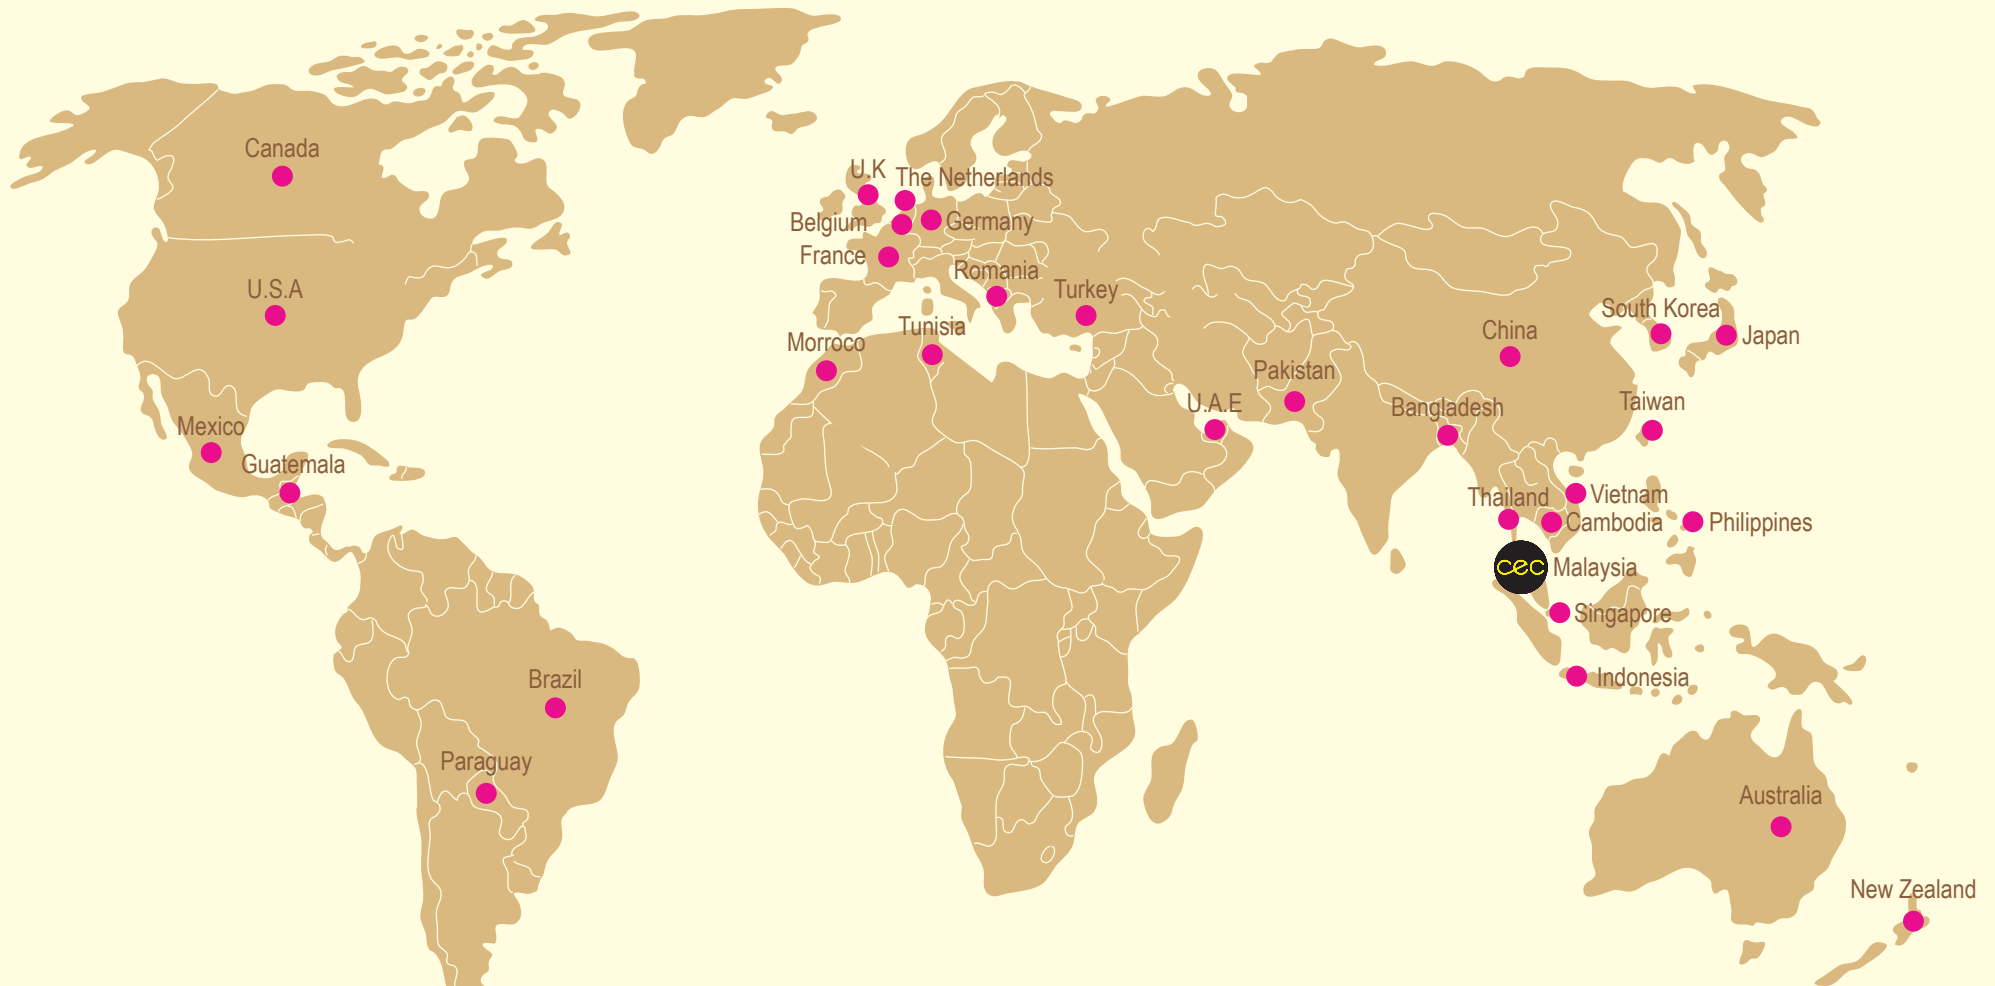

Established in 1973 in Penang, Central Elastic Corporation (CEC) manufactures high-quality rubber bands, combining 150 years of expertise with our Japanese HQ 's experience in rubber product manufacturing. We specialize in customized technical and industrial products.

We are an ISO 9001:2015 certified manufacturer and our plant is having capacity to produce 350 metric tons monthly for rubber bands and other rubber products.

We are also offering rubber sheets, silicone cup and wire cap, and HQ products like twist ties, and dressing tape.

With 50 years of excellence, CEC serves sectors from Agriculture to Electronics as a trusted partner for every application.

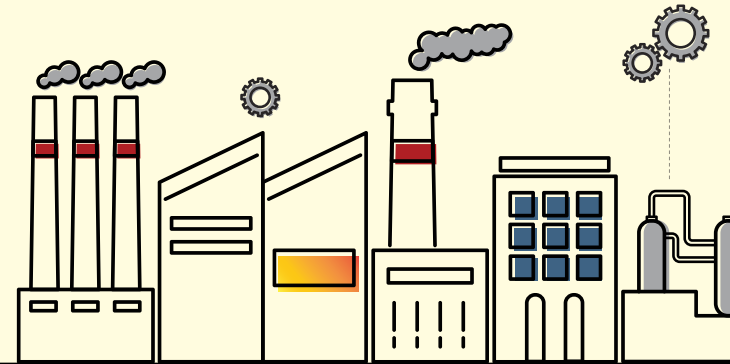

Proudly serving every corner of the globe. Our quality products are exported across Asia, North America, South America, Europe, Africa, and Australia, connecting us to trusted partners and industries worldwide.

Industries I

Served

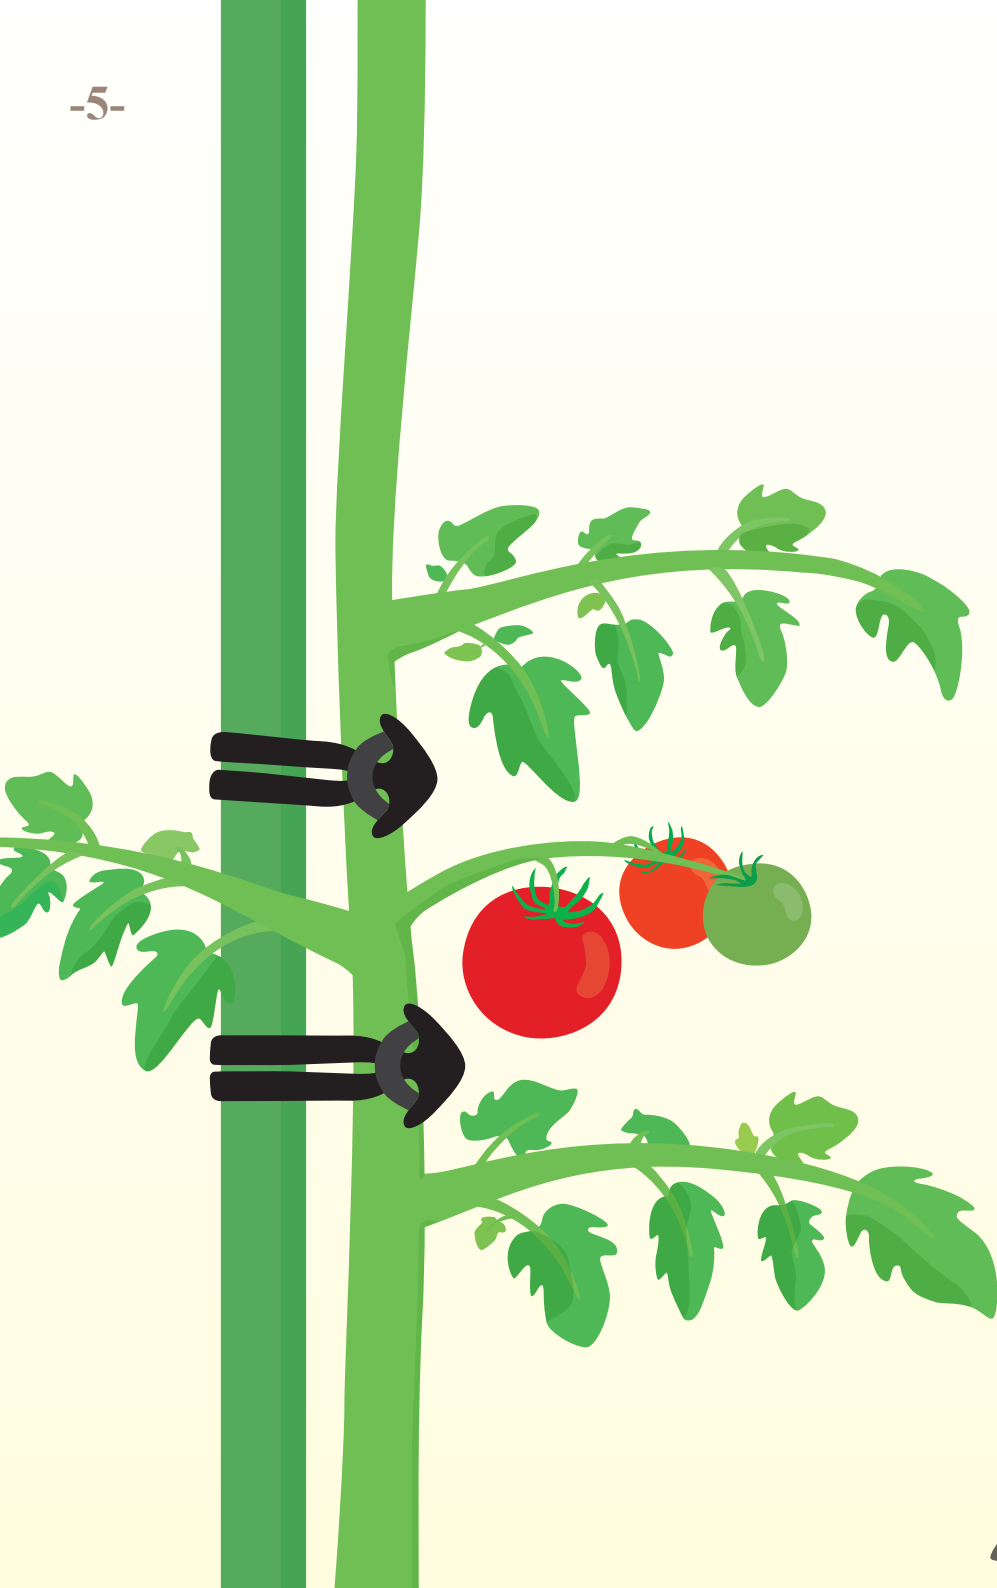

Packaging

Industry

Our packaging solutions provide efficient bundling and premium presentation for retail, warehouse, and office usage.

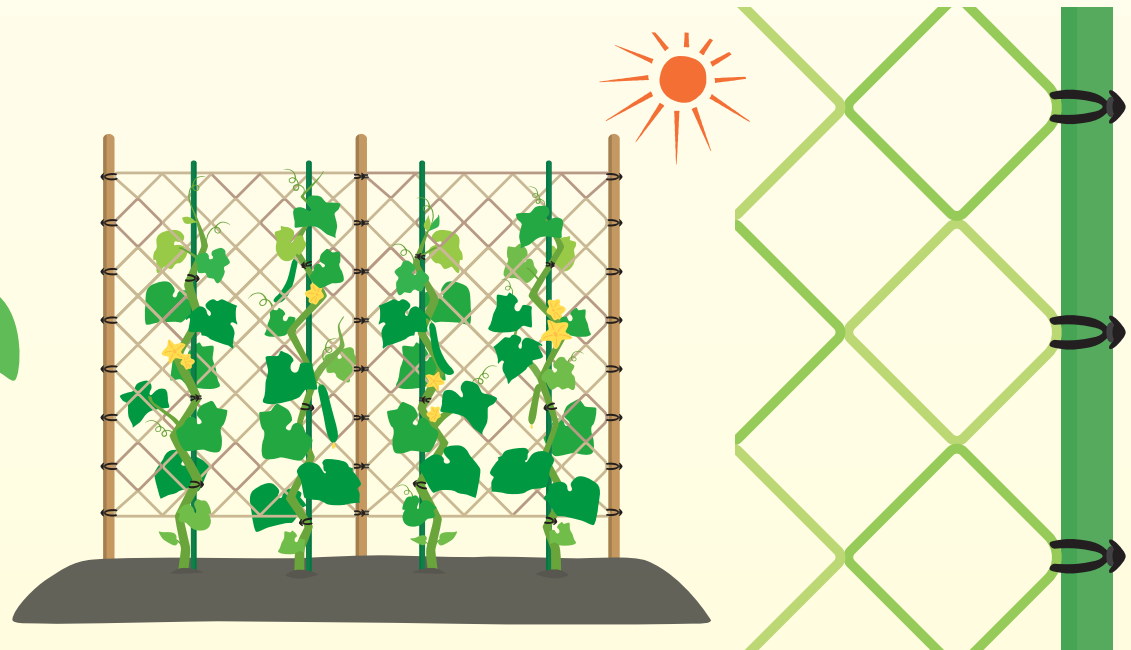

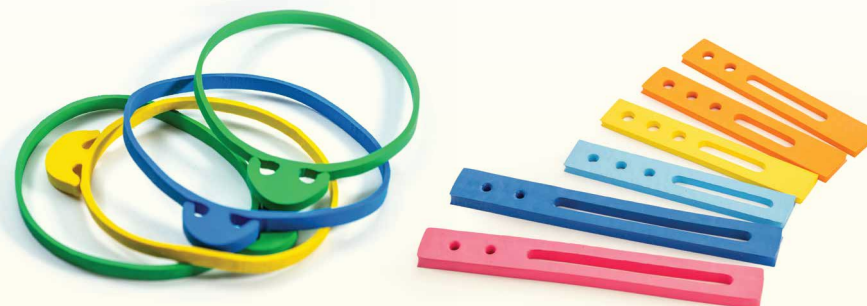

Agriculture

Industry

Our agriculture solutions are built to survive the outdoors, tying direct under sunlight without getting brittle.

Wire Harness

Industry

Our wire harness solutions optimize industrial assembly lines by keeping complex cable bundles neatly organized and easy to manage.

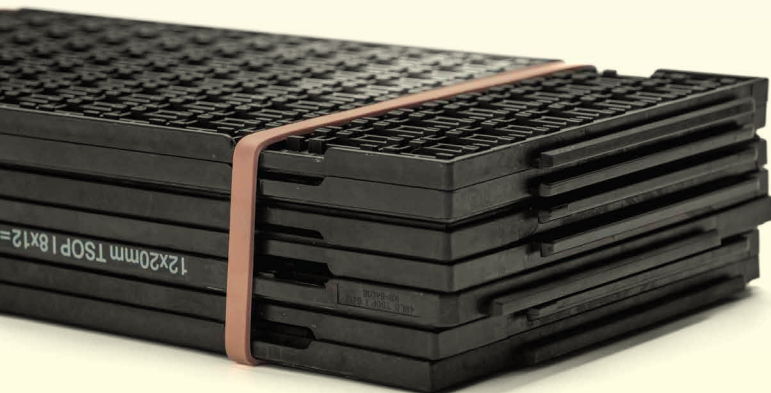

Electronic

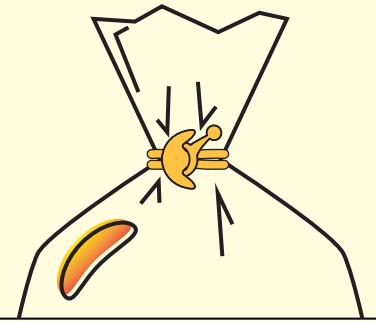

Industry

Our electronics solutions deliver essential Electrostatic Discharge (ESD) defense to safeguard sensitive electronics during manufacturing and shipping.

Products

II

General Purpose Band

Products

Standard

rubber band

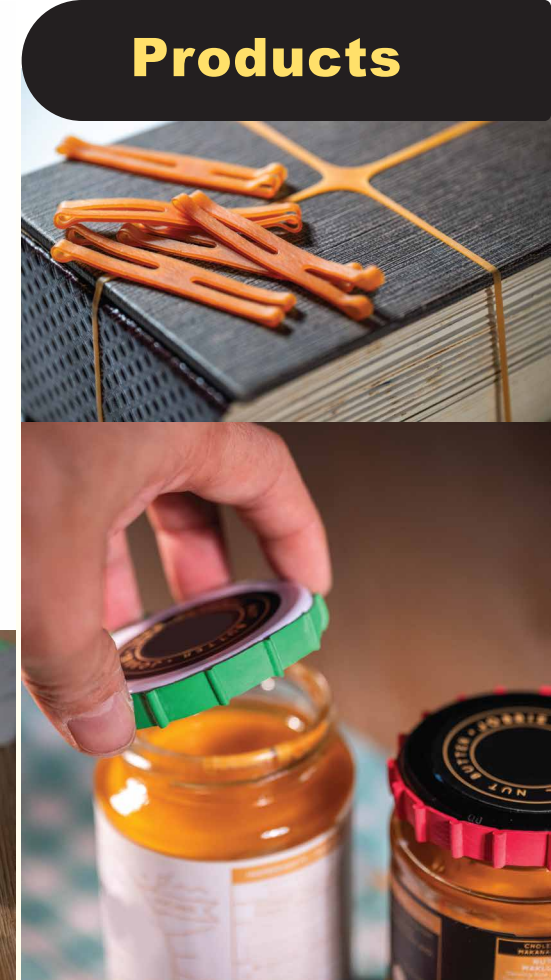

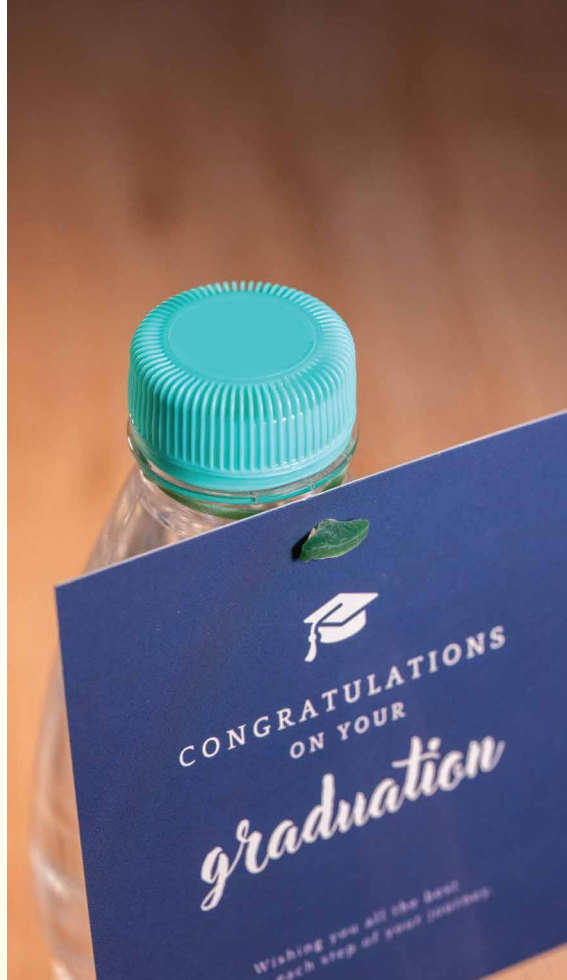

Engineered for consistent elasticity and high-tensile strength to provide a reliable, secure hold for all packaging needs. An essential, high-quality choice for efficient bundling across industrial, commercial, and office environments.

Latex Free Band
